

# THE EMPRESS EXPRESS

VOLUME IX, No. 10

EMPRESS, ALTA. THURSDAY, Aug. 4th, 1921

Price: \$2.00 Per Year

## Empress Are Winners

### of Ball League

With their win over Cleveland, on Saturday, the local ball team clinched the pennant and made their position in the league safe. Two games remain to be played but these can have no material bearing on the result:

Empress	Won	Lost
Mayfield	7	0
Cleveland	5	2
Gleannan	3	5
Lloyd George	2	5
Lloyd George	1	6

Undecided games: Mayfield at Lloyd George; Empress at Gleannan.

That the local team would get through the league schedule without suffering a single defeat was beyond the expectations of the most confident.

## Pure and Wholesome Food Products

A very apparent effect of the work of the Department of Agriculture at Ottawa is the improvement that has taken place in the cleanliness and purity of the peoples food. Especially is this true of the work performed by the Live Stock and Health of Animals branches. Better equipment at the stock yard has been brought about as well as improved facilities for transportation on the one hand and, on the other, rigid inspection at the abattoirs and slaughter-houses insures healthy and wholesome meats for consumption. It is impossible to over-estimate the value of the work that is thus being accomplished. At the canneries also cleanliness and wholesomeness are assured by the regulations that are enforced by inspectors and supervisors (continued on back page)

## VANDYNE

Miss Peterson, teacher, in the Jesmond School, intends leaving for her home in Calgary, this week.

On Friday evening, a large crowd gathered on the playground to hear the representatives of the Brome local of the U.E.A. give their proposed entertainment from March 1st. For some unknown reason they failed to make their appearance, which was quite a disappointment to the gathering. An impromptu programme was staged and with a dance helped to fill out the evening's program. One of the principal numbers on the programme was an address by Mr. Yates, school inspector for the district on consolidated schools which was greatly enjoyed by all.

Miss Butler, who has been visiting her sister, Mrs. W. Delling, for a short while, left Saturday morning for Milwaukee en route to her home in London-England.

Mrs. Harris, of Irvine, is at present visiting her parents, Mr. and Mrs. D. Reid.

Mrs. S. McMillen, of Spenceville, who has been visiting friends at Mildred, Sask., returned home Saturday.

Rev. Mr. McE, with a number of boys of district have been spending the week camping at the river. The outlook was far from promising in the spring. The team, manager and supporters can feel justly proud of the results achieved.

## Empress and Mayfield Tie in Final of Baseball Tourney

Friday, July 29, was a regular festival for the local baseball fans. The weather was forbidding and cloudy and the crowd very small, when Empress and Cavendish commenced play. The game was productive of class ball, which was marred by showers of rain and finally had to be postponed in the fifth inning, being continued directly after dinner, when the weather had somewhat improved. Ferguson bunted for Cavendish, and found the Empress team in a nitting mood. Seven runs resulted, while Cavendish managed to gather in one lone run off Northwick, who had fifteen strike-outs to his credit at the completion of the nine innings.

Owing to bad roads the Lloyd George team arrived late and Mayfield took the game by default. However, they substituted for the Empress Flats against Birdloss. At the conclusion of the seven innings, the game was a tie, both teams having scored four runs. Five extra frames were necessary before a decision was reached in favor of Lloyd George.

After giving an exhibition of hitting at the expense of Cleve.

In the semi-finals, Mayfield did not experience much difficulty in disposing of Lloyd George, but Altie put up a good game against the Empress team with Pullen serving the pills up for the locals. However, Altie were unable to secure the necessary scores, and divided third and fourth money with Birdloss.

The lone game, Empress vs. Mayfield was the real stuff for the fans. Empress opened up strongly and in the first three innings scored a tidy six runs. It was not until the sixth innings that Mayfield opened up. With two men on bases Gainer hit a three-egger and totaled three runs for the innings. They scored again in the seventh, the score being 6-6. The game was called on account of darkness. Gainer served up real food for Mayfield. A. Tait, however, as the summary will show, deserves good praise for the brand of ball pitched by him. He certainly had things his own way until weakening in the sixth inning. Northwick, who made himself very popular, pitched the latter part of the seventh, both men received good support from their team mates. The Mayfield boys also gave good support to their pitcher. McCune played his usual good game behind the bat, but Rivers could not hold Gainer. A. Rounds, was umpire, and controlled the game well.

### BOX SCORE—Final Game.

EMPIRES	A.B.	R.	H.	P.O.	A.	E.

## Present Economic Waste

Why do prices of merchandise and commodities of all kinds remain so abnormally high despite the fact that the war demand is long since past and production in almost every line has overtaken requirements? This is a question asked by hundreds of people. It is generally known that prices of raw materials have fallen, yet when one comes to buy the finished product into which these raw materials have been converted, the price asked is practically the same as during the war. What is the reason? The answer may be largely expressed in one word: Waste.

It is universally recognized that the prevailing high freight rates operate directly to increase the price of all goods, first by increasing the price of the raw materials and secondly by still higher charges on the finished article. One of the chief factors responsible for high freight rates is waste. Here are a few illustrations of this waste of which complaint is made.

Before the United States Government took over the railways of that country for operation during the war, comparatively simple jobs of changing a nozzle tip in the front end of a locomotive could be done by a machinist, or a machinist and helper, or even a handy man alone. Today under the present classification rules governing the labor industry, in order to change a nozzle tip it takes a foreman, a boilermaker and his helper to open the door, because that is boilermaker's work; to call a pipeman and his helper to remove the blower pipe, because that is pipeman's work; and to call a machinist and his helper to remove the tip, because this is machinist's work; also for the same force to be employed for putting in the new tip.

Prior to Federal control of the railways in the United States it was not an uncommon practice for a machinist and his helper to take care of all of the work necessary on an electric headlight of a locomotive. Under the McCadeo Agreement the work is now so classified as to distribute the same among three crafts, namely, machinists, sheet metal workers and electricians. If each of the mechanics performing the work has a helper, this has the effect of six men performing a piece of work that could be and was formerly taken care of by two men.

Under present rules where arrivals of trains require the service of employees two hours in the morning and two in the evening, say 8 a.m. to 10 a.m. and 6 p.m. to 8 p.m., railroads now have to employ four shifts of eight hours each, or sixteen hours service where there is only four hours' actual work. Furthermore, where two shifts are worked the starting line must be between 7 a.m. and 7 p.m. and the ending line must be between 7 p.m. and 7 a.m., so that the men working the second shift are operating conditions require a man on duty at 6 a.m. he must be paid for five hours each day in addition to regular eight-hour day.

The following illustrates the method of paying a wrecking crew under the McCadeo Agreement when performing road service: A wrecking crew composed of six men leaves its home terminal at 8 a.m., goes a distance of 50 miles to clear up a wreck; work of clearing main track is completed at 6 p.m.; crew ties up for sleep and rest from 6 p.m. to 7 a.m. next morning (wrecking outfit is equipped with sleeping facilities); resume duty 7 a.m.; pick up wreck and arrive at home terminal 2 p.m. Under the National Agreement it is necessary to pay the entire crew continuously for the first 24 hours from the time they leave their home terminal, computed as follows:

From 8 a.m. to 4 p.m., eight hours straight time; 4 p.m. to 12 midnight, eight hours of time and one-half; or 12 hours; 12 midnight to 8 a.m., eight hours at double time, or 16 hours; 8 a.m. to 2 p.m., eight hours at straight time. Total of 42 hours paid, although crew actually performed service from 12 noon to 6 p.m. first day, six hours, and from 7 a.m. to 10 a.m., second day, three hours. It will be noted actual time worked during the entire period was nine hours; balance of the time was consumed in waiting and traveling, and it will be further noted the crew was released entirely from 6 p.m. to 7 a.m., during which time they were paid at time and one-half and double time while actually off duty and sleeping.

Scores of other instances, but of which space is not available, are substantiated by an exhaustive inquiry into the subject, could be given. The above however goes to show the enormous economic waste taking place daily in connection with railway work, which waste must be paid for, and is being paid for, by the people in excessive freight and passenger rates. These high rates are reflected again in the unduly high cost of goods of all kinds.

The truth of the matter is that in paying the excessively high wages which the railway companies find it necessary to charge, the people are paying, not for services rendered, but to cover vicious economic waste, paying men for work they do not do and for services which are not performed. The whole system is wrong and is doing even greater injury to those who fancy they are profiting by it, because of the enormous economic waste and downright dishonesty which finds expression in accepting pay for work never performed.

## Selling Shoes By Pound

French Government Doing It To Get Rid of Stock

Selling boots by the pound may seem strange, but it is in fact the French Government is up against in the liquidation of the two largest French army camps. More than \$20,000,000 worth of the toughest footgear is going begging because someone put over a lot of freak sizes which couldn't be worn.

The boots are made of the best leather, but as they would require cutting in order to use even the

soles or heels, the offers received were all too small, and it was decided to sell by weight.

As a vermicide an excellent preparation is Mother Graves' Worm Expeller. It has saved the lives of countless children.

The vibrations of sound caused by spoken words can now be recorded by means of a clever invention.

Near Bingen, in Germany, is a famous echo which will toss a sound to and fro no less than seventy times.

## The British Way

Upheals Officials Who Speak For Nation Without Authorization.

Speaking of the reprimand administered to Rear-Admiral Sims by United States Secretary Doolittle for his denunciation of American Sinn Féiners and of utterances made by Admiral McAdoo regarding the United States' attitude towards France, the New York Times points out, by way of contrast, that the British Government does not check up its officials. When they presume to speak for the nation without direct authorization, The Admiralty, virtually challenging Germany to war if an attack was made upon the American ships.

## ADVICE FOR BACKACHE

When stooping hurts, when lifting and bending causes distress that's the time to rub in lots of "Nerviline." A couple of applications brings grateful relief. No liniment, ointment, or cream can cure muscular, rheumatic or sciatic pains. Thousands of homes rely on good Old Nerviline for cramps, colic, pains, and external muscular pains. One 3-cent bottle is all you need.

## Red, White and Blue Corn

Chicago Professor Produced Colored Kernels By Grafting.

After three years of experiment, Professor William L. Woodburn, of Northwestern University, has produced an ear of corn containing red, white and blue kernels.

Professor Woodburn asserted he soon would be able to perfect his work. He said that the kernels would show solid bars of red, white and blue. The colored corn was produced by crossing red and white ears to make blue ears, according to professor Woodburn, and then grafting the three varieties.

To Asthma Sufferers, Dr. J. D. Kellogg's Asthma Remedy comes like a gift from heaven. It gives new life and hope by relieving his trouble—something he has been unable to do. Kellogg's Asthma Remedy is so simple to use, its benefits are so evident to be questioned by no one. Believe it or not, this is the best advertisement. If you suffer from asthma get this time-tested remedy and find help like thousands of others.

If the whole of the watery vapor in the atmosphere were to fall at once in the form of rain it would not, according to experts, cover the entire surface of the earth to a depth of more than five inches.

## CHOLERA INFANTUM

Cholera infantum is one of the fatal ailments of childhood. It is a disease that comes on suddenly, especially during the summer months, and whose prompt attack is fatal. A little one may soon be beyond aid. One Tablet is all that is needed. It is a medicine in warding off this trouble. They regulate the bowels and sweeten the stomach and thus prevent all the dread summer complaints. ## Canadian Receives French Medal

Corporal Rescued Women From Well

Nineteen Feet Deep. Corporal David Mills, London, a former member of the British Air Force, has been awarded a medal by the "Foundation Carriage" of Paris, France. In 1918 when the English airman were at Frailis bombing the Rhine cities, Mills one night saw a number of excited people standing at a farm gate. He learned that a woman had fallen 19 feet into a well filled with water 50 feet deep. Single-handed he brought the woman to the surface though he had been told it meant death to go into the shaft and that she was doubtless dead before he had arrived.

Output of Zinc. The output of zinc from Canadian mines has more than quadrupled since 1916, according to the Mines Branch. The output in 1916 was 2,665 tons whilst by 1919 it had jumped to 11,005 tons.

For the first time on record there is an ice famine in Iceland, due to the mild winter and lack of manufacturing facilities.

In nearly one-half the gas plants in the country gas is manufactured from oil.

## Pies You'll Like

BY LORETTA C. LYNCH

An Acknowledged Expert in All Matters Pertaining to House-hold Management.

Since pie is classed among the real joys of life, if we are going to make it at all we should make it so it will do us good as well as digest.

Pasty, soggy piecrust is very difficult to digest. And even well-made bottom crusts often acquire sogginess by the soaking of the fresh fruit filling into it. For this reason such pie should be baked in a glass or earthenware dish, with an upper crust only.

The sweetened fruit should be put in the dish. Then a half-inch strip of pastry is placed over the rim of the pie plate. The strip is moistened and the crust placed over the top. The strip of pastry and the upper crust are pressed together, then the edges are trimmed. The upper crust should be gashed in several places to allow for the escape of steam.

A simple and satisfactory crust is made by adding together one and one-fourth measuring cups of flour, one level teaspoon of baking powder and one-fourth teaspoon of salt. Cut the mixture with a buttered knife. Two level tablespoons of butter or lard weigh about one ounce. Add just enough lard to hold the ingredients together. Chill. Roll out.

A piecrust should be handled just as little as possible. The top crust is a pie about the size of the bottom crust. It is made with milk or milk and egg mixed with yolk of egg. Here are some recipes readers will be asking for:

## LEMON PIE.

One-half cup flour, 1 cup sugar, 2 cups boiling water, juice and rind of one lemon, 1 tablespoonful of butter, 2 egg yolks, 34 teaspoonful salt.

## Meringue.

Two egg whites, 2 tablespoonfuls powdered sugar.

Mix the sugar and flour together, mix the boiling water and cook on the back of the range or over an asbestos mat for fifteen minutes. Add the other ingredients of the filling and cook at a simmering temperature until the egg yolks thicken. Cool and place in a baked crust. Cover with the meringue made by whipping the egg whites until stiff and then gradually beating in the sugar. Return to the oven a few moments until two meringues is a light brown. Meringue bakes easily.

## Rhubarb Pie.

Two cups of rhubarb cut into small pieces, 1 egg, 1 cup sugar, 4 tablespoonfuls flour, pinch of salt, lemon rind.

Mix sugar, salt, lemon rind and flour together; beat the egg. Add the rhubarb and four more cups of egg. Bake with a top crust only, preferably in individual pie dishes.

To all fresh berry pies, it is well to mix 3 to 4 level tablespoonfuls of flour with the sugar. This thickens the juice. If berry pie is baked in two crusts, sugar should be used in the incisions allow the steam to escape readily and prevent the juice from running out.

The juice of a can of fruit may be thickened with cornstarch or flour and the whole turned into a baked crust. The top is then covered with a meringue and browned. A busy housekeeper might have several empty crusts on hand to use with her fruit at a moment's notice. Crusts are baked on the outside of the inverted pie plate. Small tart shell may be baked on the outside of an inverted muffin or gem pan.

## Will Attempt Trans-Pacific Flight

Lieut. P. J. Parer Announces Plan at Sydney, N.S.W.

An aeroplane flight across the Pacific Ocean is to be attempted soon. It was announced recently by an Australian aviator, Lieut. P. J. Parer, who some time ago flew from England to Sydney.

To raise fifteen thousand pounds to finance the trans-Pacific attempt, Lieut. Parer has started an exhibition flight around Australia. It will be possible to follow a chain of islands from Australia two-thirds of the way across, but on the Canadian side of the ocean there will be a long stretch in which there is no land.

## Lucky He Took Wife's Advice At Time He Did, Says This Regina Man

"I was going down hill pretty fast when I began taking Tanlac, but I can say for this medicine that it turned me right round and put me back on the road to health," said William Lorenz, 2154 McKay St., Regina.

"I suffered a great deal more from the after-effects of influenza than I did from the disease itself, as it left me in a run-down condition. My stomach was upset and I had a sick and depressed feeling most of the time. Nothing I ate agreed with me. My kidneys bothered me considerably and my back ached so that I could not bend over and straighten up again without suffering agony."

"This was a lucky day for me when my wife persuaded me to take Tanlac. It changed me all around in a

surprisingly short time. It gave me an appetite and put my stomach in perfect condition so that nothing I ate disagreed with me. My kidneys do not bother me any more and my back is entirely free from pain. I gained fifteen pounds in weight, too, while taking Tanlac and just feel like a different person."

"Seeing what Tanlac did for me, dozens of our friends are taking it and they are just as enthusiastic as my wife and I are. We intend always to keep a bottle in the house so that if any of the family need build-up we can give it to them at once. I feel that it is nothing but my duty to tell others about this medicine which does so much good."

Tanlac is sold by leading druggists everywhere.

## C.P.R. Programme for the West.

The main portion of the construction programme of the C.P.R. in the west this summer is being confined to the Acme-Drumheller line, a portion of the Weyburn-Lethbridge line. It was stated by D. C. Coleman, western vice-president of the company, on his return from an inspection trip. He hopes to see the conclusion of work on the Acme-Drumheller line by the fall, but by that time he expects to see completed 18 miles more of the Weyburn-Lethbridge line, west of Alhambra.

Wonderful powers of memorizing facts are possessed by a Yorkshire laborer, who has mentally stored away 31,000 items of general information.

Some seventy periodicals printed in Esperanto, the so-called universal language, are now published.

## Prehistoric Monster Found At The Pas

Discovery Regarded as of Great Importance to Science.

A discovery of the fossilized remains of a prehistoric monster in the foothills of the Pasquah Hills near The Pas, is reported by Dr. Ellis, of the Department of Geological Survey. He found the bones disconnected but in alignment, measuring 42 feet in length. He is not prepared to state what class of animal the bones belong to, but regards the discovery of great importance to science. The doctor brought in 80 pounds of bones for shipment to Ottawa.

Something more than a century ago paper was so dear in England that hunches of laborers gave their customers the meat wrapped up in a large vegetable leaf.

## The Endurance of Your Automobile, Truck, or Tractor

Depends not only upon the time of lubrication, but the kind of Lubrication.

## WHITMORE'S AUTO GEAR PROTECTIVE COMPOSITION

Add 50c to Gear Life. Thousands of tests have been conducted by Lubrication experts to demonstrate the relative efficiency of various lubricants. The results of these tests conducted over years, have fixed the choice of states leading manufacturers. These manufacturers include:

The largest builder of cars in the world; The largest builder of trucks in the world; The largest builder of autos in the world; The largest builder of warm gears in the world.

Many lubricants contain acids. They not only fail to counteract friction, but are themselves harmful and corrosive to gear and bearing surfaces.

Whitmore's Auto Gear Compositions Contain No Acids

They are proof against heat and cannot break down or squeeze out. In the DuPont Catalogue, under the heading of "Lubrication," is an unbroken list of WHITMORE'S.

For an exhaustive list of agents, write to the Whitmore Manufacturing Co., Lubricating Engineers, Cleveland, Ohio.

## Value Of Experimental And Research Work As An Aid To Agriculture

Experimental and research work, promoted by, and under the guidance of, the Dominion Department of Agriculture, has made great strides in Canada during recent years. It is a fact, for instance, that the discovery of Marquis wheat by the Cereal Division of the Experimental Farms Branch has enriched the wheat growers of the three prairie provinces by \$20,000,000 annually, and that the introduction of Preston, Stanley and Huron wheats into the other provinces has brought about a gain of at least half a million dollars yearly. But wheat is not the only grain that has profited immensely through the work carried on at the Experimental Farms. By the introduction of Danbury, Victory, and in particular, the new one, a gain has been made of over \$90,000,000 annually, while other new grains, such as the Melba Apple, Early Marquis, and the Melba Apple, have proven responsible for an increase in value of \$3,000,000 annually. All of these must and will develop in still greater proportion to the country. Experiments in plant breeding work with garden and field crops have led to the discovery of many new varieties, such as the Melba Apple, Early Marquis, and the Melba Apple, which have been of great value to the fruit grower, while some valuable discoveries have been made in forage crops, notably a perennial red clover, immensely valuable to the farmer. Much of this research work has been done by the Division of Chemistry, and by the Division of Botany, and by the Division of Agriculture, Entomology and Seed Branches. Canada has been shown to be the healthiest of all countries in its livestock, a fact which has been reborn in large measure to the excellent system of supervision and control adopted and followed by the Health of Animals Branch. By its precautionary measures and other methods it is conservatively calculated the Dominion of British Columbia country \$32,000,000 annually, largely by its crusade against snout and its control of late blight and rot of potatoes and other diseases to which plant life is subject. Research work in its laboratories by the Seed Branch has resulted in approximately 100,000 tons of seed being made of maximum value to the livestock feeder and this is but one of the valuable results that have been achieved. Turning to the Entomological Branch, when it is stated that to field crops alone a justifiable estimate is that the depredations of insects cause a loss each year of \$125,000,000 some idea of the colossal work involved can be obtained by the greater use of crop rotations and the ascertaining of the most profitable rotations for each district. It is estimated that the Entomological Branch is benefited annually to the extent of \$32,000,000, while by summer-fallowing, a system urgently encouraged by the Experimental Farms Branch, the prairie provinces are thought to gain \$90,000,000 annually. These few facts will illustrate the importance of being made in the development of Canadian agriculture.

### Alberta Butter

Butter Production at Present is Only at the Minimum.

The announcement that New York wants a million pounds of Alberta butter will be good news to the farmers of that province. In fact the farmer will find the news as good as New Yorkers will find the butter. That is one kind of farm produce that Alberta has more of than it knows what to do with. And production at present is only at the minimum. When they go to it in earnest, under the inducement of a steady export market at satisfactory prices, there is really a limit to the amount of butter, creameries and farm dairies of Alberta can turn out. If New York will supply the market Alberta can supply the butter, in any quantity required.—Edmonton Bulletin.

### "Made in B.C." Campaign.

The "Made in British Columbia" campaign is gaining in popularity and according to the secretary, three thousand families in the province have already pledged themselves to use only British Columbia made products, and the expectation of two thousand additional pledges this week.

### Indian Cadet Corps.

Major Millar, of Calgary, is authorized for the statement that the cadets of Blood Indian reserve in Canada showed the most advanced corps in the province. This following his annual tour of inspection.

### British Stock Breeders Surprised

Canada Can Supply England With  
Finest Grade of Beef Cattle.

Members of the Chrystal party of British stock breeders and daymen who have been investigating the possibilities of the cattle industry, as a field of supply for the British market, said that what they had seen led them to arrange to give an order of at least 2,000 head of cattle, if the embargo is lifted. S. H. Jagard, of Norfolk, and James Alston, of Leicestershire, both of whom are known as very large feeders in the Old Country, are more than enthusiastic over what they saw in Calgary. Mr. Alston declared: "We never expected to see at the Calgary show anything like we did see. It was a magnificent show of the finest purebred stock. But we are not after purebred stock. We want of the ordinary type of beef cattle. And I can assure you we have seen all kinds and plenty of the finest kinds of very good cattle. We would be welcomed in England. Yes, they are the equal of anything that comes into our markets. You need have no fear about the quality of the cattle we have seen in many places, particularly in Alberta, not being acceptable to the British market. They are pleased beyond our expectations, which really did not lead us to believe that the country has such a fine grade of first-class beef cattle, just what England wants. Once the embargo is lifted, and you need have no doubt about it, we will place an order for 2,000 head from Western Canada to be shipped at once."

### France Objects To German Films

Invasion of Cinema Field Alarms  
French Producers.

A German invasion of the French cinema field is under way. Several films of German origin, but bearing Swedish, Italian and even American titles, were snapped up last month when offered at prices about 50 per cent of what the French producers are asking. They will be shown all over France. The last movies have been made by the French producers. The theatrical world now is aroused over the report that Goldstein, the Russian who recently acquired the Apollo Theatre, intends making a specialty of Viennese and Berlin music, with a new comic opera by Franz Lehár as the biggest feature next season.

### Ranching in the North

Ideal Country For Ranching in the  
Peace River District.

There is no more ideal ranching country in the Dominion of Canada than that lying along the Peace River and adjacent streams in the Peace River in the belief of Frank Jackson, who owns what is considered the finest ranch in the north country. This is located about halfway between Peace River Crossing and Fort Vermilion. He has the inconvenience of having to travel 250 miles for his mail, but states enthusiastically that the beauty of the ranch, the excellence and extent of the pastures, and the climate of the district, are more than ample compensation.

### Resources Of Labrador

Have a Waterfall that Eclipses  
Niagara is Report at Ottawa.

Canada and Newfoundland are to take the grey count to settle their dispute as to the ownership of 250,000 square miles of territory in Labrador, and to a young Toronto lawyer, Charles Percy Plaxton, has been entrusted the task of preparing Canada's case for presentation to the law lords. Mr. Plaxton is an officer of the department of justice. A party of 70 will survey the disputed territory and make inquiries as to the mineral and timber resources of the country. One report is that there is a waterfall in Labrador that eclipses Niagara.

### Increased Imports.

There was an increase of more than eleven and a half-million dollars in the value of imports to Canada during the twelve months ending May 31st, 1921, as against the previous period. At the same time the exports of Canada to the United States showed a decrease of more than \$25,000,000. The total value of imports to Canada in the period under review was \$1,762,166,362, and of exports \$1,718,948,556.

### Innovations In British Air Express

Many Novelties Introduced for Im-  
provement of Passengers.

A new De Havilland engine, Continental "jet" express" plane, improved in details, has come into service on the London-Paris airmail, according to an aeronautical correspondent in the London Times. It is now calculated that with a fleet of such machines, operating constantly on a route between London and Paris, a full complement of passengers can be carried by air at a maximum speed of 13 miles an hour, and an average "cruising" speed of 108 miles an hour, for a total cost per passenger per mile of not more than 3/10d, which is the rate of the first-class railway fare in England.

One of the innovations in this new express plane is a printed list, displayed in the saloon, of hints and instructions for air travellers. They are informed, for example, that the machine is inherently stable; that if a few "bumps" are experienced, these are due to the machine's stability, and should in no way inspire fear. The passenger is recommended also to sit comfortably in his chair, rather than to hold on tight. It is pointed out that it is permissible to move about in the saloon, in the absence of reference to the stability of the machine, as some nervous passengers seem to be.

Another novelty has just been introduced on the express route between London and Amsterdam. A special class of first-class seats, called "right from London to Amsterdam," is placed in the saloon of the aeroplane, and by means of an indicator, the passenger is informed that, when seated, passengers are informed from minute to minute of the exact position of the aeroplane over which the aeroplane is flying.

### The Unearthly Paradise

Utter Failure of the Communists  
Plan in Russia.

To Communists rendered anxious by the drying up of the golden stream from Russia, we commend the news of that country which filters through the wires of the world. Several make their escape from their native land.

Such members of the Soviet Government as can contrive to get away without their departure with bags of platinum exciting too much remark to be made by the world. Several of their opportunities. Only a few now remain to carry on the great work of regeneration by bankrupting the country. These do not seem to be entirely in accord. Mr. Trotsky is benevolently anxious to put Mr. Lenin under the care of a specialist in mental disease. Mr. Lenin is equally concerned for the health of his affectionate colleague, and recommends a "rest" in the Crimea. The popular enthusiasm towards Mr. Dzerzhinsky, the minister who took the hint, has, so far, manifested itself in the form of a mob. Meanwhile Russia itself is like a workhouse administered by lunatics.—From the London Daily Mail.

### New Colonization Policy

Planned by B.C. Government for  
Settling Unoccupied Lands.

A comprehensive colonization policy is being planned by the British Columbia Government for the purpose of settling some of the vast areas of unoccupied lands in the province. Experienced farmers are the class of men who it is desired to bring in and to these men it is proposed to loan a sufficient sum of money, up to \$2,500, to help to get started.

As in the other western provinces of Canada, the colonization is a serious problem of the country. Only one acre in 808 of the province's total area is under the plough, or one acre only is being cultivated. The province is under 350,000 acres were being cultivated. To double this farmed acreage would mean double production and sufficient food for the province would be marketed to wipe out the heavy imports of foodstuffs now necessary.

### Saskatchewan Creameries.

In 1920 forty-seven creameries operated in Saskatchewan produced seven million pounds of butter. Five new ones are in course of erection at Yorkton, Assiniboia, Weyburn, Shaunavon and Estevan. There is only one cheese factory in the province which produced 28,367 pounds of cheese last year.

### At The Crossroad.

At a crossroad it is better to sound your horn and put your foot on the brake than to step on the accelerator and try to beat the other fellow across—Youth's Companion.

### WESTERN EDITORS

Property valued at approximately  
\$100,000 will be returned to Countess  
Jeanne von Bernstorff, wife of Count  
Joanne von Bernstorff, former Ger-  
man Ambassador to the United States,  
under a ruling by Justice Wil-  
liam Hitz, in the District of Colum-  
bia Supreme Court.

By the order of the court Thomas  
W. Miller, Allen Property Custodian,  
is directed to restore to Countess von  
Bernstorff all the bonds, securities and  
other property which she had seized from  
her under the provisions of the  
trading with the enemy act.

Countess von Bernstorff brought  
suit to recover the property early this  
year, contending that by birth she was  
an American citizen, and that the  
property seized by the United States  
was handed down to her by inheri-  
tance from her father, Edward  
Luckemeyer, formerly a silk merchant  
of New York, while she retained her  
citizenship as an American.

### Countess Bernstorff Will Get Property

Millions Seized By U.S. Must Be  
Restored.

Property valued at approximately  
\$100,000 will be returned to Countess  
Jeanne von Bernstorff, wife of Count  
Joanne von Bernstorff, former Ger-  
man Ambassador to the United States,  
under a ruling by Justice Wil-  
liam Hitz, in the District of Colum-  
bia Supreme Court.

By the order of the court Thomas  
W. Miller, Allen Property Custodian,  
is directed to restore to Countess von  
Bernstorff all the bonds, securities and  
other property which she had seized from  
her under the provisions of the  
trading with the enemy act.

an American citizen, and that the  
property seized by the United States  
was handed down to her by inheri-  
tance from her father, Edward  
Luckemeyer, formerly a silk merchant  
of New York, while she retained her  
citizenship as an American.

### Experimenting With 900-Year-Old Seed

Corn Taken From Ruins In Arizona  
Looks Fresh.

The Rev. M. M. Stolz, librarian at the Kansas Wesleyan University, has received from Frederick Bronson, a graduate of the school, some relics from the ruins of Mesa Verde, in Arizona, which will be placed in the university museum. Among them are corn cobs, cornstarch and beans which were taken from under rocks where scientists say they have been for 900 years.

The cobs look as if they had been  
picked this year and the corn and  
beans are apparently in a perfect  
state of preservation. Dr. Stolz has  
planted some of the corn and beans  
and he declares that he believes they  
will sprout and grow.

### Want Better Returns

Indians of Prairies Are Now Dissatis-  
fied With Low Prices.

There are reports that the Great  
Prairie provinces are planning for  
organization and union. Big chiefs  
from the sixties: provinces have been  
in conference with their brethren at  
Thunderchild, reserve, about seven  
miles from Turfville. A big pow-  
wow was held, and numbers of  
"white" men from the surrounding coun-  
ties witnessed the weird ceremonies  
and dances. The Indians are not at all  
satisfied with the low prices they are  
now being paid for their particular  
wares, and many are the protests  
and signs of dissatisfaction.

The red men here, like many of  
their white brethren, became accus-  
tomed to high prices, and are loath  
to accept the new economic conditions.

### Cheap Real Estate.

The price that the United States  
Government paid for the land in the  
Virgin Islands was approximately  
about \$205 an acre. The Philippines  
cost an acre about 27 cents, Florida  
about 15 cents, Alaska 2 cents—Youth's  
Companion.

### Scotland Likes Canadian Cattle.

Evidence of the favorable reception  
of Canadian cattle in Scotland is con-  
tained in a cable from Glasgow, Scot-  
land, which announces that 629 Cana-  
dian cattle have been sold at 18 to  
20 1/2 cents per pound.

### Our slogan for the coming year

should be, "Buy at Home." Add to  
your own and your neighbor's pros-  
perity by keeping the money circulating  
in our own district.

### That a person can live and thrive

without the aid of a theory of a  
fellow member of the agricultural  
club can be ascertained.

### Early Days In The Hudson's Bay Service

By O-G-E-MAS-EE (Little Chick).

(Copyrighted)

It was early summer of 1878 and  
rather to my disgust I was held up at  
the Cumberland House (the headquarters  
for the H. B. Co. in that district),  
waiting for a passage to Grand  
Rapids. Every available able-bodied  
man had been engaged by the com-  
pany, either for the outfit trip to  
Long Portage, with arduous trip to  
Mackenzie River district, or else on  
the river steamers.

A missionary's wife with three lit-  
tle girls had just come in from the  
north on route for the Red River, a  
poor Scotchman with a bee in his  
bonnet had been sent in from an out-  
post with a long report showing that  
the isolation had been too much for  
him, and though not dangerous he  
was considered a sort of mental lunatic.  
I was directed to send him to Fort  
Garry for medical examination. All  
of these people made extra mouths to  
feed, and the Chief Factor suggested  
that I take them down to Grand Rapids  
by York Boat and there connect with  
the steamer Colvill on Lake Winnipeg.

It was quite agreeable to this  
provision, some sort of crew could be  
found, and after a good deal of en-  
quiry, old Antoine Moran turned up,  
a boatswain, come in by the way of  
boating. This French half-breed had  
been poisoned some years before by  
the Indians and the effect still showed  
evidently in the peculiar way he  
looked at his face and hands, the latter  
being so tender he could only do light  
work and that with gloves. However,  
I was glad to get him, and he was an  
excellent steersman and knew the  
river. There then was a young up-  
start to recover the property early this  
year, contending that by birth she was  
an American citizen, and that the  
property seized by the United States  
was handed down to her by inheri-  
tance from her father, Edward  
Luckemeyer, formerly a silk merchant  
of New York, while she retained her  
citizenship as an American.

perity by keeping the money circulating  
in our own district.

### That a person can live and thrive

without the aid of a theory of a  
fellow member of the agricultural  
club can be ascertained.

one thinks of travelling in the sum-  
mer months without a mosquito bar  
and a mosquito net, and then hang-  
ing a good tent makes living impos-  
sible.

The reader can imagine my horror  
to find that Mr. Missionary had no  
mosquito bar, having come from a  
rocky part of the country. Well, I  
could not see a woman and three lit-  
tle ones cater alone, so I and the boy  
set a tent and bar up in the stove  
sheets and our first-pass passengers  
had a good night of it, while my poor  
beggars in spite of two huge mosquito  
nets were getting close to Chema-wa  
at the west end of Cedar Lake.

The Saskatchewan River here divided into  
several channels, these often changing  
with different seasons and as the  
water was approaching we had either to tie  
up and wait for daylight or take extra  
precautions to keep the right channel.

There was fortunately a breeze  
which kept the flies away and we were  
nearly dead for want of sleep, so  
we went to bed in the morning in a  
look-out we were sound asleep in two  
minutes. I was the first to waken,  
it being broad daylight and to my  
horror found that I was not in a  
lake some distance from shore with  
no sign either of the Saskatchewan  
River or Cedar Lake. Calling all  
hands and reprimanding them sharply for neglect of duty, I in-  
quired, night have very serious conse-  
quences. I was glad to get him, and he was an  
excellent steersman and knew the  
river. There then was a young up-  
start to recover the property early this  
year, contending that by birth she was

The regular monthly meeting of the Women's Missionary Society, of Castle Coombe, will be held at the home of Mrs. F. Rivers, August 10.

## BUFFALO

Election passed off quietly last Monday, and a very small vote was polled. Mr. Chas. Fingle receiving a majority of 11.

Miss Opal Boyd and brother, of Empress, were guests of Ruth Edgington.

July 15, was a memorable day for Buffalo, it being their second annual picnic, put on by the local U.F.A. A good crowd from the surrounding country was in attendance. The usual sports began about one o'clock consisting of running and jumping, etc. The tug-of-war between Cavendish and Buffalo ladies was won by the former. The crowd then adjourned to the ball ground where the smoking contest and horse racing took place. Miss Thelma Gravett won the girls race.

While the ball game was in progress an aeroplane from Hanna, Alta., flew over the grounds, and gave a fine exhibition of looping the loop, nose diving, etc. Many passengers enjoyed a ride among the clouds, during their term, among them Mrs. J. Gillham, Mrs. Hames and Mrs. S. Conner, of Cavendish.

Birds won both ball games while Cavendish suffered their first defeat of the season.

A large crowd enjoyed the dance in the evening in Community Hall. Mr. Harold Gatenky winning the quilt raffled off by the Women's Institute.

The Messrs Gordon, of Medicine Hat, have been spending

## Notice To Creditors

In the Surrogate Court of the Judicial District of Kindersley.

In the Estate of Elmer Bern, late of Empress, in the Province of Alberta, Farmer, deceased.

PUSANT to the Surrogate Court, being Chapter 34 of the Revised Statutes of Saskatchewan, and amending acts.

NOTICE IS HEREBY GIVEN that all persons having claims against the estate of Elmer Bern, late of the District of Empress, in the Province of Alberta, who died on or about the 10th day of October, A.D. 1920, are on or before the 31st day of August, A.D. 1921, required to deliver or send by post (paid) to The Standard Trust Company, Saskatoon, Saskatchewan, Administrator of the said estate, full particulars of their claims duly verified by statutory declaration, together with a statement of the securities, if any, held by them.

AND TAKE NOTICE that after the said expiration date the Administrator will proceed to distribute the assets of the Estate among the parties entitled thereto, having regard only to the claims of which it shall then be aware, and the said Administrator will not be liable for the said assets or a portion thereof in any person or persons of whom claim it shall not have had notice at the time of such distribution.

DATED AT SASKATOON, Saskatchewan, this 1st day of August, A.D. 1921. THE STANDARD TRUST COMPANY, Administrator of the said Estate.

## ATLEE

July 28, The Atlee basket ball girls triumphed the dinner basket ball girls into the dust here, last night, in a first game which showed that Jenner does not really know much about the game yet. However, they got an eye opener on the game last night when Atlee piled up twenty eight to Jenner's goose-egg. Then the Atlee girls took the poor Jenner girls, with heads hanging and heavy hearts over to the hall and soothed them with delicious ice cream and a few fox trots after which the smiles began to bud on their countenances. Their tears dried up and evaporated. The last we heard of them was as they started home, sounded like this: "We've the cow and chickens but our ball game went to the chickens"—Lenora said so.

Miss Hilja Bjork, who has been up here for several weeks visiting her brother, Mr. Bjork and family, returned, this morning to Spokane.

Art Remde returned from Vancouver, last night. Art says he enjoyed his two week holiday immensely.

Sunday, July 31—G.E. O'Brien and Bert Powsland motored over to the Hat and Brought Miss Powsland and a brand new up-to-date baby girl with them. Bert says it is the cutest little bundle of humanity he had ever dreamed of and now he wears the smile that went wash off.

Father Dugan came up from the Hat this evening, August 2, and held 9 o'clock mass here.

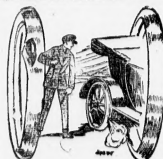

A quiet wedding took place at the home of Mr. and Mrs. E. J. Lacy on Friday, July 29, when Rev. V. M. Gilbert, united in marriage, Miss Sophie Johnson, of Lockport, Ill., and John Swenson, of Cavendish, Alta. The bride's sister, Miss Anna Johnson, was present at the ceremony, and will visit with her sister for a few weeks. Mr. and Mrs. Swenson will reside on their farm south of Cavendish. We join in congratulations to the happy couple.

Wholesome Food—cont. under the immediate control of the Health of Animals Branch, Eggs and poultry, under the Poultry division of the Live Stock Branch have been advanced in public estimation. In by-gone times householders always had certain their vocation at the farm. A neighborhood picnic being given in their honor last Wednesday.

suspicion of the eggs supplied at the breakfast table and used in cooking. They usually expect, one, two or three and sometimes more, in a dozen to prove unsatisfactory, and were truly disappointed. To-day they buy and cook with confidence. The same is true of all other articles of food watched over by this and other departments. By legislation, adulteration has been checked and as nearly as possible suppressed. The capable work not only continues out is constantly being expanded and enlarged in scope.

## WINTER FEEDING spells Winter Cream

No dairy farmer can afford to permit his cows to fall off in production towards the beginning of fall, as it will reduce the production of every cow next year.

Winter feeding requires well proportioned feed rations, similar to summer pasture. Green feed, such as corn, oats and rye, mixed with some hay makes a palatable forage and from four to five pounds of oat chop should be included in the daily rations.

Winter feeding means extra dollars and helps to make dairying pay dividends. Get your feed ready for winter now.

Write for information on Winter Feeding.
